## DAVLIN COATINGS Coloring and Tinting Policy

All paint color samples we provide are, to the best of our knowledge and ability, the colors that most closely resemble the colors created using the associated formulas. We do not guarantee exact matches to color samples. **Paint sample colors displayed on your computer monitor or mobile device are APPROXIMATIONS of the actual coating color, and can vary depending on screen resolution and settings. Due to differences in graphics settings, monitors and other factors, we encourage you to check the color, preferably by purchasing a gallon for test application, before purchasing all materials necessary for your project.**

It is the consumer's responsibility to verify that they have received the correct color before applying their paint. It is the consumer's responsibility to check all colors before any application. We recommend that you apply a small patch of colored paint in a less visible area in order to verify appropriateness of that color. We do not do color matching. We do not tint to match color cards or images that you provide.

### **Tinted materials are not returnable or refundable.**

If you believe that an error has been made in the tinting of your product, you must provide the original product in its original container, and the receipt of purchase, for color testing. *We will perform testing only at our sole discretion.* If, upon testing, we conclude that we have made an obvious error, we will correct this error and replace the product with the correct color. **No refunds will be made.** All limitations above apply to this recoloring process.

## PureOptions™ Color Creations System

[basf.us/pureoptions](http://basf.us/pureoptions)

BASF is proud to present the virtual version of the **PureOptions™ Color Creations System**. A comprehensive fan deck tool offering 1,020 vibrant colors highlighted in a four base system from pastels and tints, to mid-tones and deep.

The **PureOptions™ Color Creations System** features an expanded range of color formulations based upon PureOptions™ eco-colorants, our low VOC colorant line, in tones and hues appealing to color designers, architects and specifiers. A complete color formula is available.

This virtual rendition is a precursor to the printed PureOptions Color Creations Fan Decks which will be available 3<sup>rd</sup> quarter 2013.

We Create Chemistry – We Create Color!
